Senior Web Developer

570.905.2750 | briantomsak@gmail.com

Boynton Beach, FL

PROFESSIONAL SUMMARY:

Creative yet analytical web developer with experience managing simultaneous full life-cycle projects programming web services in various frameworks, developing technical specifications, modifying configurations, integrating synchronous web solutions via social media, and deploying code across multiple environments for a user-friendly UI/UX customer experience. In my work history, I've been responsible for developing web solutions while providing end-user support in collaboration with marketing/sales team goals.

- **Design and Program Websites**

Responsible for the design, layout, coding, modifications, security, hosting, web maintenance, coordinating site migrations, and graphics of multiple websites/web pages.

- **Web Team Collaboration**

Worked closely with web/marketing team to create detailed specification documents with clear

deliverable and timelines, ensuring timely completion.

- **Implemented Testing**

Produced documents and procedures of complex applications ensuring quality and error-free execution, while troubleshooting performance and configuration issues on the web.

- **Analytics and Site Monitoring**

Shared metrics and provided analysis of new and ongoing visitation and conversion tracking, including mobile user analytics, on-page optimization, and proper link structure.

SKILLSET:

- **Languages:**

HTML5, CSS3, JavaScript, PHP

- **Frameworks:**

Bootstrap, jQuery

- **Data/API:**

Facebook, Instagram, Twitter, YouTube, JSON, MySQL, graphAPI
